2026

NO ONE LIKES CLEANING AIRFILTERS...

IT'S A DIRTY JOB THAT WE ALL DISLIKE, BUT IT'S A NECESSARY PART OF DIRT BIKE RIDING AND MAINTAINENCE. THANKS TO FUNNELWEB FILTER, YOU CAN **RIDE MORE AND CLEAN LESS!**

THE SECRET TO FUNNELWEB FILTERS:

PYRAMID PROFILE FOAM

FUNNELWEB FILTERS FEATURE PYRAMID PROFILE-CUT FOAM THAT DOUBLES THE EXTERNAL SURFACE AREA OF THE FILTER WITHOUT INCREASING THE ORIGINAL FILTER SIZE.

2x

ADVENTURE BIKE FITMENTS

YOUR AIR FILTER IS ONLY AS GOOD THE FILTER OIL YOU CHOOSE...

FUNNELWEB AIR FILTER OIL IS BOTH DIFFERENT AND SUPERIOR TO EVERY OTHER FILTER OIL ON THE MARKET - THIS IS A BOLD CLAIM, BUT WE HAVE THE PROOF TO BACK IT !

WHAT YOU NEED TO KNOW ABOUT AIR FILTER OIL:

- **THE DIFFERENCE IN CONSISTENCY:** Most air filters oils are more “liquid” in nature and stay “wet” even after the carrier agent dries. This is the first major difference between FunnelWeb Oil and the competition; our oil “dries” to a more “grease-like” consistency. Why is this a benefit? Read on...
- **MIGRATION:** FWF oil never migrates. Because it dries to a more grease-like consistency, it stays put. It will never gravity-drain out like the competition, and it remains perfectly in place for those who like to pre-oil their filters and bag them for later use; there’s no need to squeeze/knead the filter to re-distribute the oil before installation.
- **WHAT ABOUT “TACK”?** Tacky air filter oil is actually bad because it encourages dirt to stick right on the surface, which makes a crust that inhibits air flow. A sticky filter oil is just a magnet for dust; FWF oil’s grease-like texture is the perfect consistency for keeping your filter filtering properly and ensuring your air boot and engine stay dirt-free!
- **WATER AND WASH-OUT:** Because FWF Oil is a petroleum oil, water doesn’t affect it, and it can’t wash it out or get diluted. In fact, the grease-like consistency of FunnelWeb oil actually repels water enough that it could save your day if you have a quick tip-over in a water crossing.

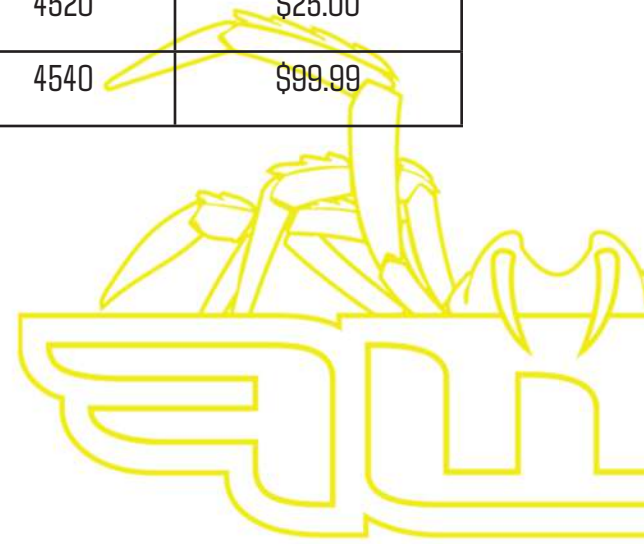

FUNNELWEB CLEANER:

As we have established above, FWF Oil is designed to stay put in your filter, and it’s hard to get out without the proper cleaner. FWF Cleaner is designed specifically to tackle our FWF Oil, and it is NOT harmful to the filter foam or glue like gas or diesel is.

Simply soak your dirty filters in a small bucket of FWF Cleaning solution for 5-10 minutes, then squeeze excess cleaner back into the bucket and rinse the filter clean with water. We recommend doing this outdoors. Filter cleaner can be used multiple times until it becomes too oil/dirt saturated to be used. Wait until filters are completely dry before re-oiling.
