FUNCTION NOT FASHION

Function is Kriega's primary concern. That is the core principle the company was launched with and has stayed true to since 2000. Function is everything, not price, fashion or gimmicks.

Kriega products are a practical investment, because we use the best and most appropriate materials and components, not the ones that will allow us to hit a predetermined price point. And when we release a new design it stays in the range for a long time, usually only being updated when an improved material or manufacturing technique becomes available. To earn the Kriega name the product is designed to excel as a piece of motorcycle-specific luggage.

For 2026, we have added the **Hydro Race**, our own innovative take on the competition-ready hydration pack, with an accompanying collection of accessories. We are also excited to launch the **R25 Guy Martin Edition**, a special version of our heavy-duty, 25L backpack in collaboration with one of our most famous and longest-standing fans. We have introduced the **OS-42** to the Soft Pannier adventure luggage range, too. If you can't pack what you need in this 42-litre pannier, you probably won't need it.

Kriega has spent over 25 years at the vanguard of the motorcycle luggage industry, enjoying success not through following trends, but simply by making products with a 10-year warranty that survive years of the harshest use.

#RIDEKRIEGA

THE ART OF CREATING EXCEPTIONAL PRODUCTS

CORDURA®

We use CORDURA® Advanced fabrics throughout the Kriega range. Recognised for their long-lasting durability and resistance to abrasions, tears and scuffs.

YKK® ZIPS

Arguably the best zips in the world, renowned for their performance and durability. YKK® are the only high quality coil zips we use on our products.

AIRCRAFT-GRADE

All Kriega metal, engineered parts are made from 6061-T6 aircraft-grade, hardened aluminum alloy providing dependable strength where it's needed.

HYPALON

Hypalon is a super-strong, abrasion-resistant, synthetic rubber mainly utilised in products designed for extreme use such as white water rafts.

WHITE LINERS

Waterproof compartments have a light-weight taped-seam liner, easily removable for cleaning and white in colour to help locate kit inside the pack.

DRYPACK

The roll-top Drypack (dp) closure is a tried and tested waterproof solution for soft luggage, giving the rider confidence to carry in all weathers.

Kriega®

An aerial photograph of a rugged, mountainous landscape. The terrain is covered in dense, low-lying green moss or lichen, interspersed with dark, rocky patches. A light-colored dirt path or road winds through the upper left portion of the image. The overall scene conveys a sense of adventure and outdoor exploration.

Kriega® **10** **YEAR** **GUARANTEE**

Kriega's goal from day one was to build a reputation for the best quality products on the market, offering the highest standards of functionality and craftsmanship.

Kriega packs are constructed from some of the most technical fabrics available today. Add to that a strict attention to detail in the design and production process and you can be sure that Kriega products will exceed expectations.

The whole Kriega range is built to perform without exception. As a commitment to quality all packs are guaranteed for 10 years against defects in materials and manufacture.

A photograph of a paved path leading into a dense green forest. The path is in the foreground, and the forest is in the background. The text "BACKPACKS HYDRATION PACKS" is overlaid on the image in a white box.

STABILITY

THE CORE

Those who have never lived with a Kriega backpack might not know exactly why they became so popular. The unrivalled build quality is a big part of it, but the ability to carry heavy loads in all-day comfort is what really made people lifelong fans.

We introduced the **QUADLOC** harness 25 years ago, tweaking the original over the decades, and also developed the **QUADLOC-Lite** harness for smaller packs in the range. Both harness concepts cleverly redistribute the weight from the shoulders, where it would quickly form a pressure point, to the chest. A rider's torso is strongest part of the body and can easily take the weight of even our biggest backpack fully loaded.

Every Kriega backpack is designed specifically for motorcycle use, so they're extremely tough, while being shaped to easily take on and off over bulky, armoured clothing. They're also adjustable to fit just about any shape or size of rider.

That's why Kriega backpacks are loved and trusted all over the world.

HYDRATION RESERVOIRS

3L HEAVY-DUTY RESERVOIR

HYPAKEHD3

2L HEAVY-DUTY RESERVOIR

HYPAKEHD2

Made of ultra-durable, abrasion-resistant TPU with RF-welded seams for superior strength and elasticity. Fully reversible for deep cleaning and drying. Compatible with all Kriega Backpacks.

Hydrafusion Tube Flexible drink tube insulates in hot weather and offers protection in tough conditions.

Comet™ Bite Valve & Dust Cover Lightweight valve self seals after each sip and can be opened and locked with one hand to prevent leaks when not in use. Included dust cover protects the silicone bite valve from collecting dirt.

Plug-N-Play Connect System Easily disconnect the drink tube. An auto shut-off valve prevents leakage, allowing removal of reservoir from your pack for convenient filling and cleaning.

Tube Management Hook & Loop harness mount included for Kriega Quadloc and Quadloc-Lite harnesses.

- Universal-fit for other soft luggage systems

KOSDBR

OS-FOOTREST ELIMINATORS

Gives the option to remove the rear pillion footrests and still have a front mounting location for an OS-BASE on the following bikes:

YAMAHA T700 Standard or Rally Seat
KTM 790/890
HUSQVARNA NORDEN 901
APRILIA TUAREG 660

T700 STANDARD SEAT - KOSFEYS

T700 RALLY SEAT - KOSFEYR

APRILIA TUAREG 660 - KOSFEAT

ADVENTURE BIKE LUGGAGE OS-ACCESSORIES

OS-RACK LOOPS

The ultra-lightweight alternative to a rear luggage rack. Aircraft-grade alloy and laser-cut Hypalon construction. Unique low-profile fasteners fit any style bodywork, even rear fuel tank bikes.

- Hook-on US-DRYPACKS / OS-ADVENTURE PACKS or ROLLPACKS
- Perfect for mounting roll-top bags and tents
- Ultra-secure whatever the terrain
- Lightweight T6 alloy - only 25g (0.8oz) per loop
- Easy-fit, just drill 4 x 6mm holes

KOSRL

OS-RACK LOOPS-KTM

KTM OEM rear rack* version of standard OS-RACK LOOPS to allow easy hook-on of US-DRYPACKS or OS-ADVENTURE PACKS or ROLLPACKS (*1090, 1190 & 1290 Top Case Carrier)

KOSRLK

SUBFRAME LOOPS

Provides a strong hook-on location to mount OS-ADVENTURE PACKS / US-DRYPACKS / ROLLPACKS to most types of bike. Simply thread around the bike subframe and back through the buckle. 4 x 500mm (20-inch) lengths of webbing with loop and buckle at one end.

KASLB4

CAM STRAPS

2 x heavy-duty nylon Cam Straps ideal for attaching roll-top bags, tents etc. Moulded Acetal buckles with ultra-aggressive grip-spikes on cam for non-slip web, even with heavy loads and wet straps.

1.5M (5ft) long, high-duty 25mm webbing

KACS150

OS-PLATFORM + OS-12 ADVENTURE PACK + 2 x 4.5L FUEL CONTAINERS MOUNTED ON STANDARD MOUNT + MOUNT EXTENSION
